ABOUT US

A lot has changed since the founding of Dover Finishing Products in 1950. Product performance requirements, regulatory changes and colour trends have necessitated that DFP and our partners adapt to the new finishing and touch-up environment.

DFP has been able to evolve and we continue to innovate by introducing new industry trend colours, products that are more compatible with contemporary finishes and packaging that better meets the needs of our dealers. In fact, we've introduced UPC barcoded labeling to the Factory Marker, Classic Fill Stick, Pump Marker and Pro Finish Aerosol lines. This will significantly help our dealers sell, track and manage in-store product.

Of course, there is always room for improvement and with ongoing input from our partners along with anticipating industry trends; we aim to keep that process moving forward.

Thank you for collaborating with DFP.

PRO FINISH 400 SERIES

Produce professional finishes with Pro Finish 400 Series aerosols. The pre-catalyzed formulation yields higher solids, greater durability and resistance to yellowing than conventional nitrocellulose-based finishes. This system offers superior compatibility when applied on an existing finish.

- Crystal clear finishes, less yellowing, great build
- Offers even application, smooth flow out and excellent adhesion
- The look of nitro-cellulose with the benefits of pre-cat

Item	Description
768450	Clear High Gloss
768400	Clear Gloss
768401	Clear Semi-Gloss
768404	Clear Satin
768402	Clear Flat
768403	Clear Dead Flat
768410	Clear Heavy Body Gloss
768411	Clear Heavy Body Semi-Gloss
768412	Clear Heavy Body Flat
768490	Premium Gloss
768460	Sealer Sanding
768465	Sealer Sanding Flat
768470	Sealer Sanding Vinyl
768500	Sealer Sanding Heavy Body

PRO FINISH SILICONE STOPPERS

Help ensure that you only find fish eyes on fish! Our Silicone Stoppers minimize the need to strip and refinish jobs infected with silicone, saving precious time and money in the process. The Silicone Stoppers, available in the 3 most popular sheens, neutralize infected finishes and build layer upon layer of smooth, clear, fish eye-free top coat. Do not top coat with any other finish.

Item	Description
768560	Silicone Stopper Gloss
768562	Silicone Stopper Flat
768564	Silicone Stopper Satin

PRO FINISH 600 SERIES

The ultimate in finishing and touch-up, the Pro Finish 600 Series is a water clear pre-catalyzed formulation designed with our highest solid content and aggressive anti-yellowing properties. Formulated for touch-up, repair and restoration. Exceptional compatibility over a wide spectrum of finishes and the best build around!

- Our highest solid content available
- Aggressive anti-yellowing agents
- Excellent compatibility with other finishes
- Does not exceed 95% VOC by weight

Item	Description
768600	Water Clear Gloss
768601	Water Clear Semi-Gloss
768602	Water Clear Flat
768604	Water Clear Satin

PRO FINISH OPAQUES

The whitest whites and the truest blacks

Item	Description
768300	White Gloss
768301	White Semi-Gloss
768302	White Flat
768313	White Antique
768330	White Primer
768340	Black Super Hi-Gloss
768320	Black Gloss
768321	Black Semi-Gloss
768322	Black Flat
768451	Black Primer

BLUSH STOPPER

White cloudy blushing in a lacquer finish caused by humidity, unbalanced solvents, lacquer sprayed at too low a temperature or air flow on a drying lacquer surface can be a huge and potentially costly issue to resolve. The Blush Stopper allows trapped humidity to escape from finishes leaving you with a beautiful clear and blush-free finish, in most cases, without having to sand, strip and refinish.

Item	Description
768555	Blush Stopper

AEROSOL TONERS

PRO FINISH TONERS

Colour, clarity and coverage... Dover Finishing System Toners offer this and more! Colour variety and finish consistency are key in any finishing or touch-up job. Our dye-based toners provide rich tones and clarity so that the beauty of the wood is preserved and transform any piece into a treasure. Combined with the high solid pre-catalyzed formulation of our 600 series, the toners deliver the perfect blend of colour, build and resistance.

? Did you know?

All DFP aerosols come equipped with fan tip sprayers? This allows for smooth application of toners and finishes reducing overspray and uneven finishing.

WATCH A VIDEO ON HOW EASY DFP AEROSOLS ARE TO USE

PRODUCTION FILL STICKS

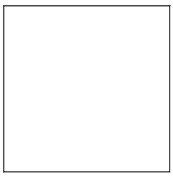

PRODUCTION FILL STICKS

Quality Fill Sticks at a fraction of the cost! Unique easy-fill harder wax formulation makes this amazing stick a must in any factory, shop or touch-up application. Because of their low cost, this is an ideal repair kit component. Used to conceal small holes, gouges and fill open joint sections. Blended from high-grade wax that won't shrink. No heating or special tools are necessary. Simply rub in and wipe off excess. Can be finished with most topcoats.

CLASSIC FILL STICKS

The Classic Fill Sticks are formulated with the highest quality blend of waxes, pigments and dyes for the finest wax repair sticks available offering superior compatibility with most top coats and finishes. The Classic Fill Sticks provide an inexpensive, durable and long-lasting repair solution to fix most minor repairs such as deeper nicks, scratches and gouges.

A vast array of colours ensures that there is always one for your job. They blend effortlessly with the natural grain and color of your wood, providing a professional repair every time.

Ideal for all types of wood and laminate surfaces, including furniture, floors, and cabinetry. Our Classic Fill Sticks are a versatile addition to your repair toolkit. Make repairing minor scratches, nicks and other imperfections a snap.

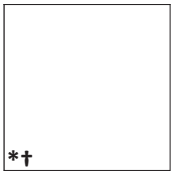

If we don't carry the colour you need, custom colours can be designed to match your exact requirement.

FACTORY TOUCH-UP MARKERS

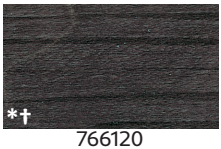

FACTORY TOUCH-UP MARKERS

The Factory Touch-Up marker is designed for application on a wide variety of finishes and represents the pinnacle of performance in the touch-up marker category. The superior fast-dry formulation makes the Factory Marker an amazing addition to production line environments and other on-site applications, where speed and efficiency are critical in restoring worn areas and repairing surface imperfections. The patented synthetic tip keeps its shape longer than conventional felt tips while maintaining a smooth and even flow. The beveled tip allows for both fine and broader strokes. The new plastic tube construction combined with our advanced airtight 2-click cap seal, will prolong the life of the marker more than ever. You demand the best and these markers deliver!

PUMP TOUCH-UP MARKERS

PUMP TOUCH-UP MARKERS

Superior formulation valve action markers touch up like never before. Colour and seal in one simple operation. The Pump offers a quick fix to repairs on worn edges, scuffs, nicks and scratches. Richer dyes, more effective solvents and a superb range of colours will allow you to take on any repair job. The markers are excellent on more porous surfaces such as MDF, where colours/stains need to stay on the surface. Pump up your Touch-Up!

HD TOUCH-UP MARKERS

HIGH DEFINITION BRUSH TIP MARKERS FOR PRECISION APPLICATION AND EXTREMELY FINE LINE GRAINING

The HD Touch-Up Marker with brush tip delivers precision application and extremely fine line graining. The synthetic brush tip applies fine lines or very long, smooth runs without losing colour to the tip. Create additional tones and shades by applying colours on top of each other or to seal Fill Stick repairs. State of the art quick drying resins and dyes result in a durable finish that can be handled or clear coated almost immediately.

FILL-YOUR-OWN MARKERS

Fill these markers with your own stains and colours that you use during production for a perfect repair. Excellent for touching up worn edges, scuffs, nicks, etc. These markers are valve operated - depressing tip opens valve to start material flow. Our synthetic tip markers give you the ability to work with products of varying viscosity from dye-based stains to thicker pigmented finishes.

- The Fill-Your-Own Touch-Up Markers are versatile and easy-to-use. They are the ultimate choice for precision custom touch-up work
- Achieve professional-like results
- It features an aluminum body that holds up to 10 ml of your own finish, stain or paint
- Each marker includes: an aluminum tube, valve, tip, cap and ball bearing

Item	Description
771001	Empty Touch-Up Marker

DRY LUBE

This thin Dry Film lubricant resists oil, dirt and dust build-up by penetrating into the tiniest openings and sealing out moisture preventing corrosion. Excellent for drying out electrical and electronic components. The NSF H2 registration for use in Canadian meat and poultry food processing plants. The convenient 360° spray valve allows spraying from any position.

768550	Dry Lube

GOODFILLA HEAVY BODY WOOD FILLER

THIS IS THE HEAVY BODY PASTE FILLER YOU'VE BEEN LOOKING FOR!

Gork's GoodFilla Heavy Body Wood & Grain Filler is an exceptional, easy to sand and non-shrinking water-based wood patch. The heavy body filler has excellent adhesion and does not shrink. It need only be applied once unlike emulsion based products which often require re-application after sanding has "vibrated out" the repair. This saves you time and money.

- Excellent adhesion and is easy to sand
- Save time and money by only applying once versus competitor products that require several applications
- Can be top-coated with all finishes, can be stained and can be tinted (including tannic acid based tints)
- Offers 50-75% more coverage versus competition
- Zero waste – GoodFilla reconstitutes with water. Zero VOC and non-toxic
- Freeze-thaw stable

SEAMFIL PLASTIC LAMINATE REPAIR

THE ORIGINAL LAMINATE REPAIR

SeamFil has been used to repair small nicks and gouges (1/4" in diameter or smaller) in laminate surfaces commonly found in kitchens and bathrooms since the 1950's. It is the original countertop laminate repair product. SeamFil is also designed to be used to fill seams between sheets of laminate, as its name implies

SeamFil repairs nicks, seams and gouges with ease. It bonds mechanically to the substrate of the laminate. It dries hard and becomes a permanent part of the laminate surface. It resists moisture, detergents, and other household products as effectively as the original laminate.

- Typical applications for this product are filling standard joints, cracks, chips and other imperfections where the dark substrate is visible
- SeamFil will hide defects beautifully for the life of the counter
- Colour Mixing Charts are available for Formica Laminated Plastics, Nevamar Decorative Laminates, Pionite Laminated Plastics and Wilsonart International

COMPLETE SEAMFIL
PRODUCT ASSORTMENT

SEAMFIL PLASTIC LAMINATE REPAIR KIT

This kit is designed to provide the necessary tools to create custom SeamFil colour matches for successful laminate repairs. Kits include eleven 1 oz. tubes of SeamFil colours, a 1 oz. Retarder, a half pint of SF-99 Solvent, a Putty Knife and an easy-to-use Mixing Guide.

The 11 colours are: white, gray, tan, brown, black, primary yellow, primary red, orange, almond, spectrum green, spectrum blue.

Item	Description
786000	Seamfil Plastic Laminate Repair Kit

QUICK CURE WOOD EPOXY

Can be used to repair, rebuild or restore anything made of wood or laminate. Easy to use and available in a natural wood tone. Quick Cure Wood Epoxy is a two-part epoxy system. Simply cut off the amount required and knead until uniform color is achieved and mixture begins to heat up. Apply to damaged area then level and contour the surface of the repair. Can be drilled, sawed, carved, sanded, stained or painted. The ideal problem solver for the woodworker. Uniquely packaged in small cylindrical shaped tube. Perfect for on-site work.

640200	Natural

STEEL WOOL

From extra fine #4/0 to coarse #3 and everything in between, our Steel Wool pads address all of your abrasive needs, from stripping to final abrasion of high gloss finishes. Avoid oil residue from standard retail steel wool that can compromise a stain or finish application. Be confident with the industry leader in quality and value.

MITREBOND ADHESIVE

MITREBOND

MitreBond is the original and strongest quick setting adhesive on the market. No nails, no clamping, no waiting - no mess!

MitreBond has many uses and can be used on Cornice & Profile Mitre Joints, Melamine end strips, door trims, picture frames, MDF skirting, joints and more.

- MitreBond is quick and clean and sets in 10 seconds
- No mixing or heating
- Use one or two drops per joint – a 50g bottle is sufficient for 100 cornice joints
- Result is a very clean and tight joint every time
- Apply to: MDF, Timber, Glass, Ceramics, Aluminum, Chipboard, Perspex, Steel, Porcelain, some Plastics

Item	Description
700515	50 g Glue with 200ml Aerosol Activator
700517	100 g Glue with 400ml Aerosol Activator
700519	Aerosol Activator 400 ml
700520	500 g Glue

MITREPEN

MitrePen is quick and clean way to speed up gluing! It is a precision superglue accelerator in marker form rather than an aerosol spray activator. Precision application helps to prevent staining caused by overspray. MitrePen goes further than you may think. It covers the same area as 3 x 200ml aerosol activator sprays. It's smaller size makes it easy to carry around.

Item	Description
700516	50 g Glue with MitrePen

PC WOODY

PC-Woody® is a two part epoxy paste that is excellent for filling cavities in wood. Make permanent repairs without shrinking, cracking or popping out of interior or exterior wood. Sand, drill, nail, prime and paint or stain.

- Easy 1:1 mix ratio.
- Paste can be tinted with colorants or dry pigments

700527	PC-Universal Glue 10.3 oz
701013	PC-SuperEpoxy 28.4 g (1 oz)
701015	PC-SuperEpoxy 32 oz

TIMBERMATE WOOD FILLER

Timbermate Wood filler is an Interior grade 4 in 1 Wood Putty, Grain Filler, Edge Filler and Crack Filler. When thinned slightly with water can also be used as a sanding sealer. Timbermate does not shrink, sink, crack or fall out and has an indefinite shelf life. It is non-flammable, non-toxic and can be used to the last gram.

Timbermate is proudly 100% Australian made and 100% Australian owned.

- Excellent adhesion and is easy to sand
- Can be top-coated with all finishes, can be stained and can be tinted (including tannic acid based tints)
- Offers 50-75% more coverage vs competition
- Zero waste – reconstitutes with water
- Freeze-thaw stable

GOUDEY WOOD BLEACH

Goudey's two component Wood Bleach is designed to remove the natural colour from bare wood and lighten the colour of stained wood leaving a more uniform surface to stain or finish. It is a high quality industrial strength two component wood bleach and the components can be mixed in varying proportions to adjust the strength of the bleach. This product will generally bleach even the most difficult wood species.

- Kits cover approximately 120 to 500 sq. ft. (based on the size of the kit)

Item	Description
678650	Wood Bleach Kit - 1.25 Litre
678651	Wood Bleach Kit - 5 Litre
